Comparison by Age in ADA, CPS, and MRDD Residential and Non-Residential Settings Combined

The analysis compared the responses of consumers by three age categories: (1) youth under the age of 18 years; (2) adults between 18 and 49 years of age; and (3) adults 50 years of age and over. Both adult groups were more satisfied with services. The oldest consumers were most satisfied with where they lived, the amount of choices in their lives, and their opportunities to make friends. Younger consumers rated the safety in the home and neighborhood as higher, as well as their satisfaction with what they do in their free time.

Comparison by Whether Resided in Residential Treatment in ADA, CPS, and MRDD Residential and Non-Residential Settings Combined

The analysis compared the responses of consumers by whether the individual had lived in a residential treatment facility during the past year. Consumers that had not lived in a residential treatment facility were more satisfied with the services they received. Those who had lived in residential treatment facilities were more satisfied with how they spent their day, opportunities to make friends, what they did in their free time, and how safe they felt in their neighborhood.
